

DIGITAL TIME SWITCH

ECOSAVERS

EcoSavers® Digital Time Switch

The EcoSavers® 24 Digital Time Switch is an advanced timer with large display and digits.

This product can help you save energy by setting a timeframe where the connected device will only get power and function for a set time.

Use this device for example in combination with your lighting, wifi router (switch off at night), computer etc.

Besides energy saving, this product is also a convenient product. Activate light for example when you are on holiday, to help prevent burglary.

Technical Parameters

Voltage: 230V/50HZ
Max load current: 16A
Load Power: 3680W
Working temperature: -20-70 °C
Timing segment: each day or each week
for 16 segment
Count down setting range: 99 hours
59 minutes
Timing error: ≤1 minute/ month

Working condition:

Working Voltage: 175Vac~276Vac
Voltage Frequency: 45~65HZ
Working Current: ≤16A
Working Temperature: 0~50°C
