

LAMPBASE TIMER

ECOSAVERS

EcoSavers® Lampbase Timer

Everybody will recognise the problem.
You enter a room and somebody before you
left the lights on.
A waste of energy and money.

EcoSavers now brings you the solution!
This patented and design registered product
saves energy in an easy way.

Just connect the lampbasetimer between the
lamp base and the lamp and select the time
you want to switch off the light automatically
(between 5 and 60 minutes). When you or
someone else forgets to switch off the light,
the lampbasetimer will do it for you.
An effective and easy way to save energy.

Plug and play.
Installed in only a few seconds.

EU patent no. 1038660
EU design registration no. 001901893

Working voltage:	220-240V/50Hz
Max. power:	
Incandescent lamp:	60 Watt
Energy saving lamp:	20W
Lamp base :	E27
