# EcoSavers® Multi Socket Footswitch

Voltage : 230V ~50 Hz  
Max. Load : 16A / 3680Watt  
IP20

The EcoSavers® Multi Socket Footswitch is a 6 port multi socket where 1 socket is always on and 5 sockets can be switch on and off with the external (foot)switch.

This product is very suitable for use with your TV set. Connect the TV box to the 'always on' socket which ensures you will receive all the software updates and for quick restart.

Connect all other appliances such as TV, home cinema set, video, DVD etc. to the other socket ports and switch them off and on with only one click. Reduce standby power by switching off !
