

# PIR SENSOR LAMP BASE

**ECOSAVERS**

# EcoSavers® PIR Sensor Lamp Base

The EcoSavers® PIR Sensor Lamp Base is a smart device which can be plugged into any E27 size lampbase and is installed between the lampbase and the light source (lamp).

The PIR sensor notices any motion of human body and will turn on the lamp automatically; the lamp will be switched off after the preset time.

Automatically turns on when somebody is in the room; automatically will turn off when no motion is detected anymore.

An easy and simple energy saving product. Plug and play !
