## CO<sub>2</sub> Meter 4-in-1

The EcoSavers® CO<sub>2</sub> Meter helps you monitor indoor air quality for a healthier and more comfortable indoor environment. Especially in well-insulated homes, proper ventilation is essential to maintain good indoor air quality. By monitoring CO<sub>2</sub> levels, you can identify when additional ventilation may be needed and optimise your ventilation habits.

### 4 Practical Functions in 1 Device

In addition to measuring CO<sub>2</sub> levels, the EcoSavers® CO<sub>2</sub> Meter offers three additional functions:

- CO<sub>2</sub> Meter – Monitor indoor CO<sub>2</sub> levels to help you maintain a healthy indoor environment and optimise ventilation.
- Powerful LED Flashlight – A bright, practical light for everyday use and outdoor activities.
- Thermometer – Monitor the room temperature and help prevent unnecessary heating, reducing avoidable energy consumption.
- Hygrometer – Measure indoor humidity to help maintain a comfortable humidity level and identify conditions that may be too humid or too dry.

### Smart Features for Everyday Use

#### Magnetic Base

The integrated magnetic base allows you to conveniently attach the CO<sub>2</sub> meter to any suitable metal surface for easy access and visibility.

#### Portable Design with Handy Strap

The included strap makes it easy to carry the CO<sub>2</sub> meter wherever you go. Ideal for use at home, on the campsite, outdoors or on your boat.

#### Rechargeable and Replaceable Battery

The EcoSavers® CO<sub>2</sub> Meter features a built-in rechargeable 18650 Li-ion battery. The battery can be recharged via the USB Type-C charging port and replaced at the end of its service life, helping to extend the product's lifespan.

#### Monitor Air Quality. Use Energy Wisely.

With its combination of CO<sub>2</sub> monitoring, temperature and humidity measurement, and a powerful LED flashlight, the EcoSavers® CO<sub>2</sub> Meter is a versatile companion for a healthier indoor environment and more conscious energy use.

#### Technical details:

Battery: 18650 Li-Ion 3.7 V / 2,000 mAh  
CO<sub>2</sub> range: 400 – 5,000 ppm  
Temperature: -10 °C – 55 °C  
Refresh rate: 2 seconds  
Charging input: USB-C 5 V / 1 A  
Charging time: 3 – 4 hours  
Battery life: > 300 hours
