

# DOOR SWEEP BRUSH

ALUMINIUM 30-30-33CM

**ECOSAVERS**

# EcoSavers®

## Door Sweep Brush

### Aluminium

Another handy invention from EcoSavers: the aluminum insulation door brush that consists of 3 parts instead of 1 part.

Suitable for doors with a maximum width of 93 cm (= maximum width standard door).

The aluminum door brush from EcoSavers consists of 3 parts:  
33cm - 30 cm - 30 cm

This has the following advantages over the normal door brush which are generally 1 meter:

- 1) Much lower transport costs: the EcoSavers door brush can be sent as letterbox post (so you don't have to stay at home with it) instead of parcel post
- 2) Much lower packaging costs and therefore also much less environmentally harmful for transport: no expensive large boxes or expensive tubes needed for shipping
- 3) No cutting is necessary for the standard door sizes 63 and 93 cm
- 4) Maximum standard door size is 93 cm (standard door sizes from 63 to 93 cm with 5 cm interval); much less waste than 1 meter product

The EcoSavers Aluminium Door Brush is provided with high-quality 3M double-sided tape. Simply make the door grease-free and then the door brush can easily be attached to the door without drilling or screws.

The total height is 41mm, of which 20mm aluminum part and 21mm brush part.

Because the aluminum is laser cut, the seams between the parts are barely visible.
