

FRIDGE FREEZER THERMOMETER STAINLESS STEEL

ECOSAVERS

EcoSavers® Fridge Freezer Thermometer

Did you know that if you keep your fridge or freezer too cold, the fridge and freezer takes much more energy then needed ?

To preserve your food and saving energy at the same time, the best temperature to set your fridge is between 4-7 degrees Celsius and for the freezer between -18 and -20 degrees Celsius.

This thermometer helps you to set the right temperature for your fridge and freezer.
