EcoSavers® Keyboard Stickers

PC STANDBY MODE REMINDERS

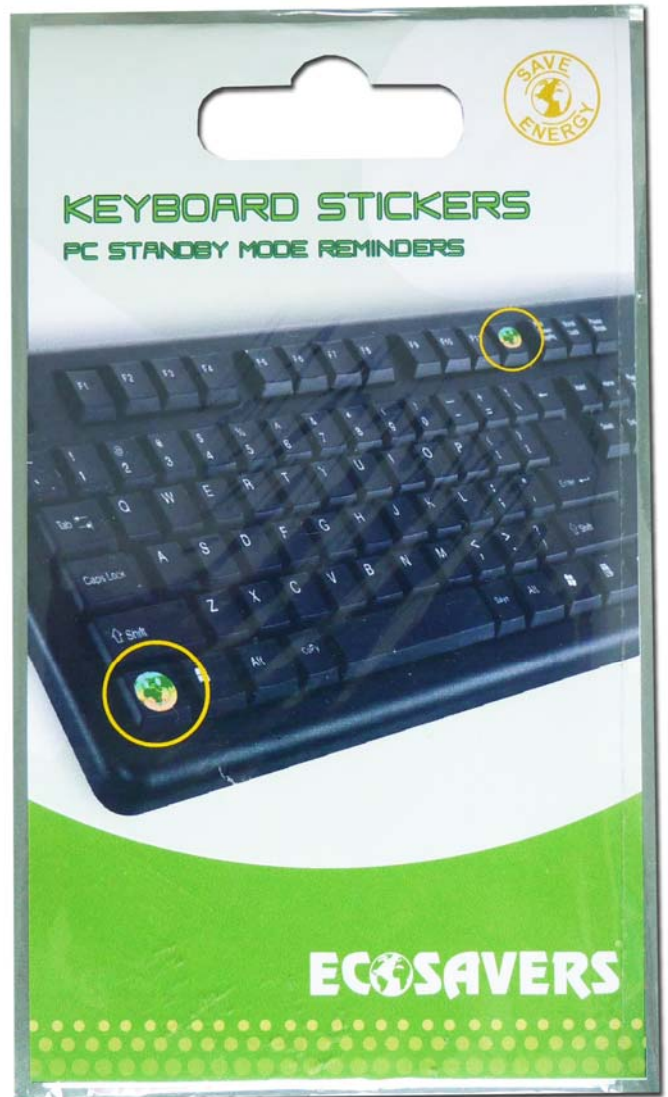

Another clever and innovative product developed by EcoSavers®.

This is a small set with 6 silver coloured stickers which can be placed on keys on your keyboard or mouse.

The clear step by step instructions inside the packing explains you how you can easily make a short code key code in less then a minute. This key short code can be used to set your PC into standby mode; it is not only saving energy, but also your data is better protected when you are away from your PC.

The stickers can be installed on the keys you programmed to be your short code; helps to remind you to set the PC in standby mode and save energy! Simple but very effective.

The EcoSavers Keyboard Sticker set is the perfect item for mailings and give-away for promotion.
