# EcoSavers® PIR Socket Switch

Another smart product from EcoSavers®, the PIR Socket Switch.

Connect the PIR socket switch to the mains and then plug in the device you want to switch.

When the passive infrared sensor detects movement of human body, it will switch on the device automatically. If the PIR does not detect movement anymore within 5 minutes, it will switch off the device automatically.

With integrated daylight sensor for operation only in dark conditions for lighting. With the supplied sensor-slide accessory can also be used in bright conditions for use with fans, airconditioning etc.

EcoSavers® makes saving energy and money easy !
