# EcoSavers® ShowerTimer LED

EcoSavers introduces another EU design registered showertimer, the ShowerTimer LED.

This elegantly designed timer can be placed nearby your shower. Just push the front and the timer will start counting. The LED light color shows you the showering time:

- Green 0 – 3 minutes
- Blue 3 – 6 minutes
- Red 6 – 9 minutes
- Red flashing 9 – 12 minutes

The timer will automatically stop after 12 minutes, but ofcourse you can also manually stop the timer by pressing the front.

This device will politely remind you of your showering time and so help you to save energy, water and money.

Very educational for children as from very young age they can recognise colors.

0 - 3 minutes green

3 - 6 minutes blue

6 - 9 minutes red

>9 minutes red flashing
