STAINLESS STEEL

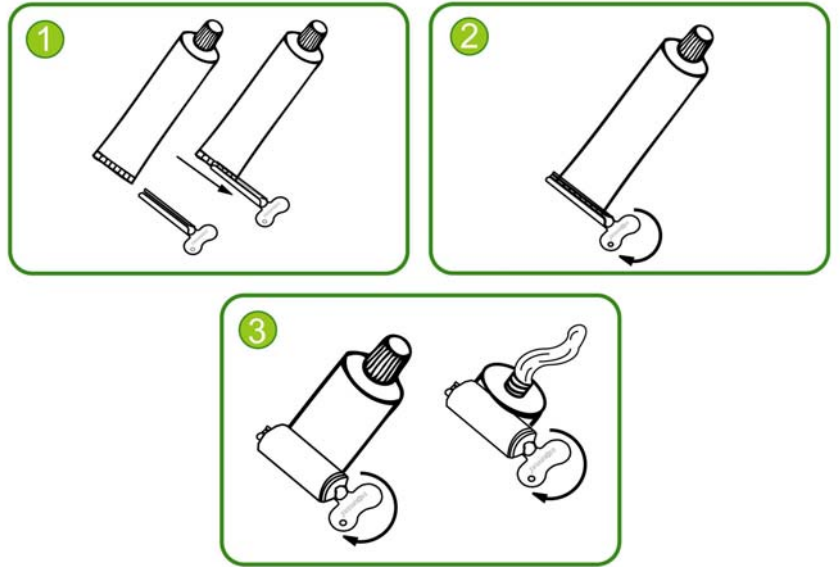

ECOSAVERS

EcoSavers® Squeeze Saver Stainless Steel

EcoSavers Squeeze Saver is a handy tool to get the last scraps out of a tube. By sliding the stainless steel tube squeezer onto the end of the tube, it can easily be rolled up with the Squeeze Saver.

Many food and cosmetics in tubes are not used every year because leftovers remain in the tube. With the Squeeze Saver you can easily use these leftovers. Durable and money saving at the same time!

Stainless steel #201 with EcoSavers brand laser engraving.
