

STANDBY SAVER TV

ECOSAVERS

EcoSavers® Standby Saver TV

Did you know that a TV device can have a standby power of up to 15W ?

Especially older TV devices have big standby power use and these TV devices nowadays are used in bedrooms or as a second TV set.

The EcoSavers Saver TV takes over the standby function of your TV, but at a very low power consumption of less than 0,25W !

Saving energy difficult ?
No, EcoSavers products make it easy.

Technical data

Operating voltage: 230V/50Hz
