

# THERMO-HYGRO METER

WITH RECOMMENDED TEMPERATURES AND HUMIDITY

**ECOSAVERS**

# EcoSavers® Thermo Hygro Meter

Do you heat up your room to much?  
Fridge or freezer too cold? To high  
humidity in your house ?

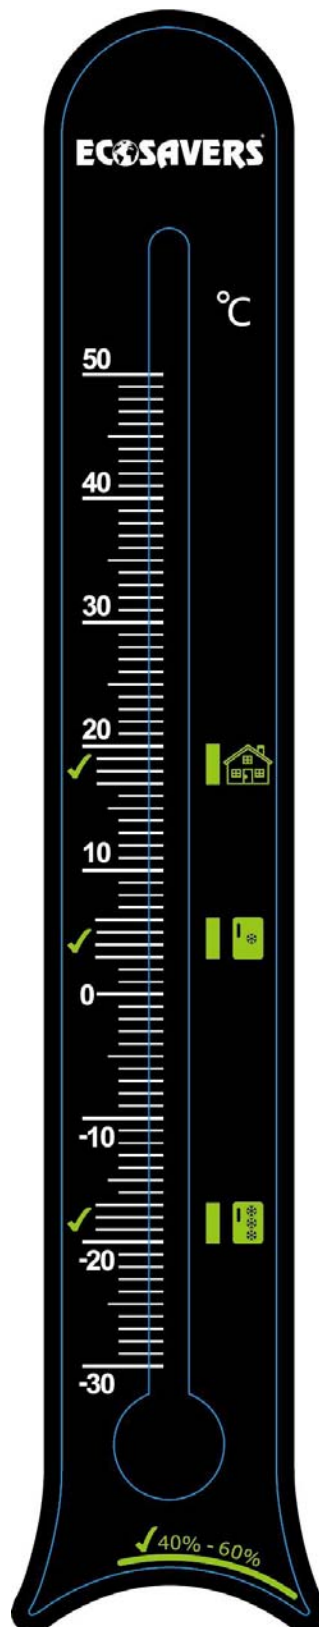

The Ecosavers® Thermo Hygro  
Meter is a:

- Thermometer using kerosene base (no mercury) and measures reliably the temperature in a range between -30° Celsius to +50° Celsius.
- Humidity meter measuring relative humidity between 0% and 100%.

This thermometer helps you to reach the optimal temperature for your rooms, fridge and freezer and therefore helps you to save energy.

Did you know that air with high humidity will take more energy to heat up ?

Optimise your inside climate and keep humidity between 40% - 60% and do not waste energy by heating up air with too high humidity.
