

THERMO SWITCH CONTROL

ECOSAVERS

EcoSavers® Thermo Switch Control

The EcoSavers Thermo Switch is a smart temperature controlled switch.

This handy device can switch connected appliances when the temperature goes higher then the temperature set, or go lower then the temperature set. With the special clip, you can attached the sensor to a heating pipe.

Perfect for use in combination with floor heating. The pump of the floor heating is running 24/7 even in summertime. This is not needed as in summertime there is no heating request. This device switches the pump on when there is a heating request and the heating pipe becomes hot.

To prevent the pump get stuck because of out of service for a long time, this clever product will switch on the connected device (pump) 1 minute every 24 hours.

You can easily select the required switching temperature by using the dial wheel.

Easy and simple energy saving!

Technical details:

Operating voltage:	230V AC / 50Hz
Maximum load:	9A / 2.070W
Temperature range:	10°C - 60°C
Accuracy:	± 0,5°C
