# EcoSavers® 24 Hour Timer Analogue

The EcoSavers® 24 Hour Timer Analogue is a very basic time switch.

This product can help you save energy by setting a timeframe where the connected device will only get power and function at a set time.

Use this device for example in combination with your lighting, wifi router (switch off at night), computer etc.

Besides energy saving, this product is also a convenient product. Activate a light for example when you are on holiday, to help prevent burglary
